12 Commonly Overlooked Checks During a Pre-Trip Inspection

1. Remember to properly check your trailer and truck wheels
2. Don't forget to check the bolts, fluids and the mounted components
3. Check the tires to ensure that there are no foreign objects, cuts or cracks
4. Pay extra attention and test the truck braking system
5. Check the tractor and trailer lights
6. Never overlook your seatbelts. You need to check them for signs of wear or frayed edges. Your seatbelt will not protect you if it snaps!
7. Don't overlook the emergency kit
8. Keep your cab always clean
9. Check the reflectors to make sure that they are free of cracks and dirt
10. Always check the wheel lug nuts; you don't want one of your wheels to come off!
11. Never Forget the Paperwork
12. Get low and look underneath to make sure that there are no solid objects lodged between the tires
